---

Kelly and Michael-

The response to DEQ comments on the 1/25/11 T4S1 FS are generally acceptable. The intent of DEQ's Comment 2 was that remedial alternatives for subsurface contamination in the cesspool area should be comparatively evaluated to support remedy selection, rather than pre-selecting capping as the remedy. It is not clear why evaluation of the cesspool area should be conducted separately in Section 7 instead of within Sections 8-10. The language "capped" and/or "already capped" for this area appear in Sections 7 and 9 and should be changed.

Please let me know if you have any questions, and provide a schedule for submitting the revised FS.

Thanks-  
Tom
